Product change of modular terminal blocks of the PT 4 series
Please forward this information to your electrotechnical departments!

Dear Sir or Madam

The modular terminal blocks of the PT 4 series were further developed. In this connection, the internal structure of the terminals was modified.

The technical data, the view from above on the terminal as well as the approvals remain the same. Furthermore, it is possible to mix terminals of different production statuses and you may still use the common accessories.

As of the 4th quarter of 2014, you will receive products of the new production status.
Enclosed please find the products which you purchased in the past.

Do you have any questions or requests? You are welcome to contact our support engineer or the sales team in Blomberg.

We thank you for your understanding and are looking forward to a continuously successful cooperation.

Yours faithfully

PHOENIX CONTACT Deutschland GmbH
