## Bourns Announces Extended Values for the SRR1208 Series Power Chokes

Bourns announces the availability of more values in the [SRR1208 Series](#) power choke product offering. New values will extend the range to 10,000  $\mu\text{H}$ . Formerly, the range of the SRR1208 was 2.5  $\mu\text{H}$  through 1500  $\mu\text{H}$ . The new values added to the range are: 1800, 2200, 2700, 3300, 3900, 4700, 5600, 6800, 8200, and 10,000  $\mu\text{H}$ .

All of the values of Model SRR1208 are available in lead-free versions. The addition of an “L” suffix at the end of the part number designates a termination that contains no lead. Pricing for the standard and lead free versions of the SRR1208 in the new values is the same as pricing for the existing values.

An updated specification sheet is available on the Bourns website, [www.bourns.com](http://www.bourns.com), under “Inductors.” Samples are available on request.
