REACH LEGISLATION

Cornell Dubilier Position on European Union (EU) Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) Legislation

- Advanced Parametric Search

We have received many communications concerning REACH activities. After working with an EU Representative, we find the following:

Products

- Inverter Applications
- Capacitors by Dielectric
- Capacitors by Series
- Capacitors by Application
- Capacitors by Brackets

Preregistration number for substances in articles: We currently do not have any products that would be considered an article with a substance intended to be released during normal and reasonably foreseeable conditions of use. We therefore do not have a need for pre-registration.

Substances of Very High Concern (SVHC) under REACH: We currently do not have any SVHCs used in the production of our product that are on the published list. We will continue to review as the list is expanded. Should there be a item in our product that appears on the list, we will declare this to you within 45 days, advise the level, and how to safely handle.

I will be your REACH contact. If you have any questions, please do not hesitate to be in touch with me at the numbers provided below.

Your business is very important to us.

Sincerely,

[Linnea Cvirko](#)
