Subject: Novel Coronavirus (COVID-19) Notice of Force Majeure Event

Dear Valued Customer:

As you are aware, the novel coronavirus (COVID-19) outbreak has been declared a global health pandemic by the World Health Organization. This emergency, with geographic quarantines, plant closures, significant travel restrictions, and mandatory social distancing measures has adversely impacted supply chains throughout the world. For our Nogales facility, the state government of Sonora has extended the shelter in place directive to at least through May 17, 2020.

Please be advised that CTS Corporation and its subsidiaries (“CTS”) has been adversely impacted by these events. The Nogales, Mexico facility has received a permit to resume limited manufacturing. With this permit CTS/Tusonix can continue to accept new purchase orders, however, due to the significantly limited manufacturing at the Nogales facility there will be delays in order fulfillment of up to 6 weeks. CTS’ inability to meet delivery commitments due to this significant public health crisis is an unforeseeable event beyond our control constituting a Force Majeure event.

CTS is monitoring the COVID-19 situation closely and will promptly communicate any updates via our sales team. Please contact me if you have any questions.

Sincerely,

Fred Baum
EMC Products Managing Director
